(c) Persons who vote by the paymen of a Registry Tax are reminded that if they with the privilege of voting during the coming year, 1851, they must pay their Tax by the last day of this month. The Collector of Taxes, Oliver Wead Esq., has received the Tax Book, and will be at his house, No., 230 Thomes Street, corner of Fair, from the 24th in the 31st, inclusive, of this month, from 12 M. until & P. M., for the purpose of recieving mid Tax. All persons whose names have been registered, should be sure to call and pay their Tax before the time expires; if they neglect doing this, they will be deprived of voting next year, no matter what important elections may take place. We hope our Whig friends will attend to this matter, without delay.

There was another disturbance at the Jail, Monday evening, caused by Clarke, the Burglar, who created the rebellion there about four weeks ago .-He became so outrageous. Monday evening, that it became necessary to handcuff him again; his feet have remained ironed ever since the first disturbance. Although he is ironed, in this way, he succeed in demolishing the window in his ced and with a piece of the sush, he reached out of a hole leading into the pessage way, and broke nearly all the glass in the east window of the passage. Mr. Taggart had to take everything out of his cell, leaving simply his bed on the foor; he even destroys the tin page in which his food is given him. He continued to scream at the highest pitch of his voice, all night, and to use the meet foul and indecent language, to the great disturbance of Mr. Taggart's family, as well as those residing in the vicinity of the Jail.

The Legislature will have to make an appropriation at the January session, for the purpose of enlarging the Jail, and providing for the better secur ity of the prisoners. There are now fifteen prisoners in the Jail, nine of whom ore Burglars; they are all cronies and accomplices, although when they first met they pretended not to know each other, but there is no doubt they have all been leastes of Jails together, long before this. As the collection of present arranges, the prisoners can all con verse with each other, and these Burghirs carry on constant intercourse in a kind of Flash language, which no one but themselves can understand; and in this way they arrange their plans. It is impossible to keep the prisoners with any degree of security, or to pretect the neighborhood from constant disturbunce, as the Jail is at present arranged. There are new some eight or nine most desperate acoundrels there; and as Burglaries are so frequent all around us, we must expect to have more of these gent ry around Newport. Providence is terribly infested with them, and, in fact, almost every place in New England As a precautionary measure, it will be weil for our citizens to keep some kind of fire-arms, and if they should receive a call from any of these rascals, just give them a ball, and it will prove the most cifectual remedy.

. We urge this matter of enlarging the Jail apon the Legislature, by building tour wabstantial and safe cells at the west of the present building, because it ts absolutely necessary for the protection of the community.

And we will show the noble men who have struggled so long for us, that we are not unworthy of their toils and anxieties. She has invested in the English three per cents. about \$750,000. Her annual income. therefore, from that source alone is about \$21,000. He states that she has given away in charity about £84,000 (\$100,000) as near as can be estimated. £27,000 of this was given in England; £5,000 in Edinburgh. In Edinburght she gave five concerts at a guinea a ticket. On the first four she cleared £20,000; and on the fifth an additional £5,000, which was devoted to charitable purposes. Matinees or Day Balls .- The elite of Lauisville are enjoying themselves at brilliant entertainments denominated matinees, or day balls. These general ly take place at mid-day, when the shuttera are closed, gas is lighted, the company assemble, and cotillions, waltzes, polkas, and flirtations, become the order of the day, as they have heretofore been the order of the night, at fashionable assemblies.

The Portland Advertiser gives the official census of Maine for 1850, from which we find that the population of that State is 583,026, being an increase of 81,230 since 1840. The Advertiser says: "It will be seen by this official statement, that Maine falls far behind Massachusetta and Rhode Island, and does not maintain an equal struggle with New Hampshire, Connecticut, and Vermont. This is a result at which, in view of the past, we may feel mortified, but which is not unaccountable."

Labor in Vain .- Martorelli, it is said. spent two years upon a treatise to show that the ancients were unacquainted with the use of glass for windows. A fortnight after he had published his claborate work, a house was discovered in Pompeii with place windows a

THE TRUE LIPE. The mere lapse of years is not life. To mat, and drink, and deep; to be exposed to sarksem and the light: to pace round in the mill of habit, and turn thought into an implement of trade— this is not life. In all this but a poor fraction of the conscientiouspess of humanity is awakened; and the sanctitties of life still slumber which makes it most worth while to live. Knowledge, truth, love, beauty, fuith, alone can give vitality to the mechanism of existences the laugh of mirth which vibrates through the heart, the tears which freshen the dry waste within; the music that brings childhood buck, the prayers that draws the future near, the doubt which makes us meditate, the death which startles us with mystery, the hardship that forces us to the struggle, the anxiety that ends in trust-are the true nourishment of our natural being.

IFAt a late term of the Court of Common Pleas, in Plymouth County, Mass, Judge Mellen presiding, Mr. H. W. "A GREAT MEDICINE of the various Patent Medicines of the day, whese theroughly creatived of their value. Among those we consider, worthy of notice is the Gornan Bitters, invented by Dr. Hondand, and upgared by Dr. Jakeon, in Philadelphia. One instance is particular, in which the superior virtues of this niedicine has been tested, has fellen under our observation. During the less samuer, a son of Mr. Abrahan Cubiil, of this country was very seriously affected with Liver Complaint, and after trying in vain various remedica, he purchased a bottle of the Eiters, and after using it, was so much relieved of his distressing maduly, that he procurred another bottle, and is restored ventired to health.

This medicine, it imaces it set strengthening in its effects, and richty deserving of an unbounded, popularity; which, when it becomes known, it will, no fouls, fully enjoy. I ludge M. M. Noah said, in his "Weekly Mescenger," January 6, 1850.

"Dr. Hooffland's German Button, Heir is a preparation which the leading pressess in the Union appear to be mainmois in recommending, and the reason is obvious. It is made after a prescription furnished by one of the most cekbrated physicians of modern tipnes—the, hie Dr. Christopher Wilhelm Hooffland, professor tarthe University of Jena, private physician to the king of Prusia, and one of the greatest medical writers Germany has ever produced. He was emphatically the enemy of husbary, and therefore a medicine of which he was the invessor unlet and order the prevention of the stomach, Constipation, and all complaints prising from a disordered condition of the stomach, the liver and the intestines. Wine Philadelphia papers express their conviction of its excellence, and services of the effect from their own individual experience. Under these circumstances, we feel warranted, not only in call ing the attention of our readers to the present proprietor's (Dr. C. M. Jackson's) preparation but in recommending the article to all afflicted."
